

Add Room Construction Items

This Guide will show you how to add items such as windows and doors to your 3D floor plan.

1. Click the “Item Catalog Icon” from the left menu bar.
2. Click “Room Construction”.
3. Select the items you would like to add such as “Doors and Openings”. Alternatively, you can use the search bar to look for items such as “Doors”.

4. Select a door, then click, drag and drop it onto the wall where the door is located.

5. Once in the wall, click and drag to adjust the door's location.
6. If the door does not swing the appropriate way, use the flip button(s) in the Item Properties window on the right.
7. Adjust the dimensions by typing them into the properties window or by clicking on the white circle on the door and dragging to the desired width.
8. Items such as a windows, may need to be raised or lowered off the floor and can be done so by adjusting the "Distance From Floor" field.
9. Change the color of each part of the item by selecting the color thumbnail(s) in the properties window.
